

# KenCrest

Your Dreams. Our Mission.

## HOPE GROW HERE

### COMMUNITY MEDICAL HOME

KenCrest's adult community medical homes provide a community living option for people diagnosed with intellectual disabilities and have complex medical needs. All of our medical homes are in the state of Pennsylvania (Montgomery County) and meet or exceed PA state licensing requirements.

Individuals with developmental disabilities and complex medical needs reside in specialized community medical homes that enable residents to live their best quality of life based on their health and social needs. Each home is customized to meet the needs of individuals, fully accessible based on the Americans with Disabilities Act (ADA) Standards for Accessible Design, and centrally located in suburban neighborhoods with round-the-clock nursing care to provide medical support.

In addition to the specialized medical attention, residents receive support services, transportation to and from appointments and community activities, therapy services, and the opportunity for community engagement activities.

### Healthy, Safe, and Hazard-Free

Community Medical Home KenCrest strives to ensure that each community living home is safe, clean, and hazard-free. All KenCrest homes are licensed and fully comply with, and in most cases exceed, the requirements set forth by state guidelines.

All KenCrest adult community medical homes are located in safe communities that are fully accessible and equipped with proper lighting.
