

## How To Draw A pumpkin Patch Picture

Start by drawing lightly so you can erase later.

Start with a row of large circles for the basic pumpkin shape. In front of the large circles draw smaller ones of different sizes. It is more interesting if some pumpkins are in front of others.

The pumpkin leaves are like big floppy stars with rounded points. Draw the five or six lines for the veins down the center and off to the sides. The veins will look like fingers or a spider so draw a line around the veins like a large glove around a hand.

The vines are each two lines that curl and loop around and go different ways. Start like a winding twisty scribble then draw a line on each side of the scribble to make it thick. It should come to a point.

Pumpkins have creases that go from the stem to the base. Do not draw too many keep them curved. The stem is curved and wide at the base. Use rough texture on the stem.

Add a world like a garden, cornstalks or a fence. Use a rough scribble texture on the fence. Use a dark smudgy or dotty texture on the ground.

Use shading technique to give the pumpkins roundness, and to bring out the creases. Make the leaves darker than the pumpkins and the fence darker, make the soil the darkest.
