

Employment Services

Supported Employment Programming

Since 1984, KenCrest has worked in Pennsylvania communities to build employer partnerships, identify existing paid employment opportunities, and create new, customized paid positions. KenCrest matches job candidates with their careers based on their skills and preferences for employment. Our employment goals focus on providing each individual with the type of employment they want and will enjoy. Our trained and certified staff's objective is to assist individuals in finding careers they love and supporting their success. Our methodology has resulted in excellent customer satisfaction and an average job retention rate of seven years! Supported Employment is available in Berks, Chester, Montgomery and Philadelphia Counties in Pennsylvania.
